Know Do Share: LumiSight Employee Health Module

Know

The LumiSight Employee Health Module is live for any and all users. Currently, the Employee Health Hotline is in **high demand**. Employees who have been EXPOSED or are SYMPTOMATIC can now use the "I have possibly been exposed" or "I have COVID-19 symptoms" links within LumiSight's web-based application as well their Mobile App to bypass long hold periods and potentially clear themselves for work. After completing a general screening questionnaire, the user will be directed to arrange their own post-exposure COVID test(s) based on the entity's current stage of operations.

These new workflows aren't meant to replace the Employee Health Hotline, nor is it intended to replace medical advice or treatment. Individuals should consult with their health care providers as needed for further evaluation and assessment, and the Employee Health Hotline will remain open for anyone with additional inquiries or complicated medical histories.

Employees who call the EH hotlines to report an exposure or symptoms will be re-directed to first complete their LumiSight questionnaire.

Do

If you're **symptomatic** and need testing, **please log into LumiSight** and enter your symptoms. You will be prompted to schedule your test.

If you've been **exposed** to someone who is COVID positive, **please log into LumiSight** and press the tab that states "I have possibly been exposed" found in the Health Quicklinks section.

The Employee Health Hotline remains open for employees who are experiencing difficulty with the LumiSight questionnaries, or to address complex exposure questions.

Employees who test positive should not call the EH hotline until you are ready to be cleared for work.

Your estimated return to work is based on the following criteria:

Asymptomatic – stay out for 5 days, can return on day 6 (day 0 is date of positive test + 5 days)
Mild to moderate illness – stay out 7 days, can return on day 7 (day 0 is date of symptoms/date of positive test + 7 days)
Severe to critical illness – stay out between 10-20 days (day 0 is date of symptoms/date of positive test + 10-20 days)
Moderately to severely immunocompromised, regardless of symptoms – stay out at least 10 days, requires MD clearance (day 0 is date of symptoms/date of positive test + 10 days)

Call for return to work clearance 1-2 days before your anticipated date of return at the following:

For PB, please call the Employee Health COVID Hotline at 808-691-8720
For West, please call Employee Health at 808-691-3050 Mon-Fri 0730-1600
For QNHCH, please call the Employee Health COVID Hotline at 808-691-8720
For MGH, please call the Employee Health COVID Hotline at 808-691-8720
